

PASSPORT-HD

Simply Dependable, and Built to Stay That Way

30' AND 35' LOW-FLOOR CUTAWAY BUS

No more compromises! In the past, small low-floor buses meant light-duty. The Passport-HD changes that. Manufactured with the construction processes used in all of our heavy-duty buses, the Passport-HD offers a robust body cage construction and industry leading corrosion protection, allowing it to stand up to your harshest applications. So many tasks, one solution. The Passport was designed for superior floorplan flexibility with accommodations for up to five ADA-compliant wheelchair positions and even dual passenger entry/exit doors! Realizing that no two customer applications are the same, the Passport offers a wide array of transit/shuttle options. The ElDorado National Passport-HD, the perfectly simple solution!

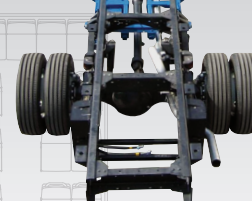

DESIGNED AND BUILT IN THE USA! 

BEAUTIFULLY SIMPLE

The Passport-HD retains all of the major components of the chassis including the suspensions, axles and powertrain for proven dependability. Want a second opinion; read the Passport-HD FTA-10 year / 350,000 mile Altoona test report and believe!

BUILT FOR BUSINESS

Have a demanding application? The Passport-HD is the only low-floor cutaway to consider. Built with the same robust cage manufacturing methods as found on our 40' low-floor buses, the Passport-HD has the goods!

EASIEST ACCESS

Designed for true accessibility, the Passport-HD has a nearly flat entrance transition and floor for superior wheelchair entry/egress. Standard 102" wide body provides excellent wheelchair maneuvering. Don't compromise, go Passport-HD!
